New Student Orientation - Computing on Campus

For the Orientation Computing on Campus session, you should have Firefox open, and be on the OSCR Getting Started page, http://oscr.arizona.edu/get_started. Click the Orientation Presentation to begin.

Move through the slides by clicking the ▷ button, at the top of the screen. Links in the presentation will open in a new browser tab. To get back to the presentation, click the Computer Orientation tab.

During this session, you will become familiar with Student Link and WebReg and have the opportunity to get a NetID and password, and set up your University e-mail. Where you see a ⚙ symbol, follow the directions given.

You may click any other links in the presentation, as well, but it is not necessary. You can access the information given in this presentation later using the Getting Started link.

Just the Links!

Checklists

In Computing on Campus Orientation:
- Create your NetID
- Set up University e-mail account

Registering for classes:
- Check class availability in Schedule of Classes
- Note Department code, course number and section number of desired classes
- Use WebReg in StudentLink to register

Bringing your own computer to campus:
- Make sure all OS updates are installed
- Enable firewalls (on Windows PCs)
- Check that subscription to anti-virus is current, or install free Sophos Anti-Virus from UA SiteLicense
- Register your machine
- Register your NetID for UAWiFi
