Using UAWiFi with an iPhone

Recent updates to the iPhone’s functionality now support UAWiFi! Follow these steps to enable this capability:

**Step 1:** Turn on Wireless Functionality: Go to “Settings” on your iPhone, then choose “Wi-Fi” and slide the switch to “on”. (If you are already using WiFi on a different network, go to Step 2.)

![Step 1 Image]

**Step 2:** Under “Choose a Network...” select UAWiFi. (Don’t tap the arrow.)

![Step 2 Image]
Step 3: Enter your University NetID for the username, and your NetID password for the password, and then tap “return”.

Step 4: Tap “Accept” to accept the security certificate that appears.

Finished! Keep the following details in mind:

- If you are unable to connect after putting in your username/password or after accepting the security certificate, try rebooting the device by holding the standby button button for 5 seconds, and then sliding the switch to “Power off.”

- Whenever you change your NetID password, you will need to recreate these settings in order for your iPhone to reconnect to UAWiFi.

- If you have any other issues, come visit the 24/7 Support Center in MLK 207, open anytime! You can also call (520) 626-TECH (8324).
